## The Decimal System of Numbering Houses.

One Hundred Numbers are set apart for each square, and the initial or starting-points are at the Delaware River and Market Street.

Persons can, by merely looking at the numbers on the Houses, know how many squares they are from the Delaware or Market Street.

By-Streets are numbered as though they extended to the Delaware or Market Street.

Numbers properly arranged, suggest distances to the mind; but improperly placed, they lead to confusion.
